What we know about our past, what we remember ourselves, what we were taught at school, who our parents and teachers told us about. So today we Shine our curatorial hour, Alim Khan, Abuovich Ermakovu. Kazakh public figure, one of the founders of the "Alash" party, the first Kazakh Professor-mathematician.

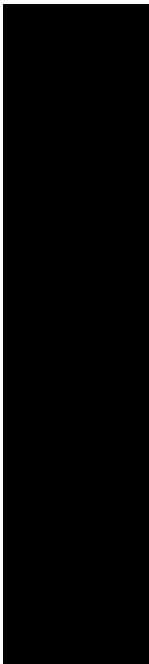

According to official figures, was born in 1891, but as he said later about himself, in fact in 1889 in the family of influential steppe pastoralists in the town of Baristas, village No. 1 Temerinski parish Karkaralinsk County (later the village number 6 Aktogay area) Semipalatinsk province. At that time, parents of children from the Kazakh steppe did not always manage to find out about the possibility of their children's education in time. So Alimkhan Yermekov's father had to lower the child's age a little to determine his son's admission to a Russian school.
