**REVIEW**

The department of "Nanotechnologies and metallurgy" of Karaganda State Technical University is a compelling example of the positive connection of educational and scientific activities. The department not only masters modern methods of training and lectures on topical problems of materials, but also successfully carried out scientific work of students, bachelors, masters and doctoral candidates and their defense.

The presence of high-class scientific equipment, participation in international cooperation programs, invitations to foreign scholars is an important criterion of that the department of "Nanotechnology and Metallurgy" is commendable in its activities.

The IMASH RAS is looking forward to continuing scientific cooperation with the Department in the respective fields of nanotechnology and metallurgy.
