Review about the Department of "Nanotechnologies and metallurgy" Karaganda State University

Within the past five years the department of "Materials Science and Technology of Metals" of Tomsk Polytechnic University works closely with the department of "Nanotechnology and metallurgy" of Karaganda State University. The employees of the department conduct joint scientific work, and the results are published in scientific journals. Fruitful cooperation promotes a good material and technical base for both our and the department of "Nanotechnology and industry." In educational work there is also close cooperation. The teachers of the department of "Nanotechnology and metallurgy" visited repeatedly the department of "Materials Science and Technology of metals" and conducted workshops with students. The teachers of the department of "Materials Science and Technology of metals» went to Karaganda to lecture to students on the core subjects. We hope for the further fruitful cooperation.

Acting Head of the MSTM Department

A.G.Melnikov
