

## Congratulations!

08.04.2022 at 10.00h. the qualifying stage of the International Engineering Championship "Case-in" was held on the MS Teams platform.

The International Engineering Championship "Case-in" for solving fuel and energy and mineral resource cases, an effective tool for transferring practical knowledge, experience and new competencies to future engineering specialists.

The championship is an actual educational project of the mining and energy sector, which is based on one of the most modern training techniques – a business case. The championship is a competition during which student teams need to solve an engineering case prepared based on the materials of leading industry companies in ten days and defend their ideas before an expert commission consisting of representatives of industry companies, scientific and educational organizations.

Every year our students participate in the qualifying stage, and for five consecutive years they have taken 1st place in the direction of "Electric Power Industry". This year our university was the first to participate in the Automation and IT league.

According to the decision of the expert commission for the Automation and IT league, the following teams took over:

- 1st place "Phoenix"
- 2nd place "The Rocket Team"
- 3rd place "BASQA" team

The following teams took the "Electric Power Industry" league:

- 1st place "Triode"
- 2nd place "Future Energy"
- 3rd place "Electrosila" team

The teams that took 1-2 places advanced
