

On January 16, 2025, an event on the implementation of the Bullington Korgan project was held at the College of Innovative Technologies of Karaganda Technical University named after Abylkas Saginov as part of the Week of Legal Literacy on the topic "Law and Order".

The organizer of the event on the topic "Bullying and cyberbullying among teenagers" was Kurbanova Kamazhai Bauyrzhankyzy with the active participation of the KPO 9/22-2 group.

Bullying and cyberbullying are serious problems faced by teenagers all over the world. At school, colleges, or online, kids can become victims of ridicule, humiliation, threats, and manipulation. These experiences leave deep traces, and often teenagers do not know how to deal with them.

We must all take responsibility for creating a safe and supportive environment where there is no place for violence and humiliation.
