

Cisco Networking Academy of KarTU named after Abylkas Saginov

Cisco Networking Academy of KarTU named after Abylkas Saginov has been operating since 2019. The laboratory complex of the Cisco Academy is equipped with all the necessary tools for fruitful work in the study of various protocols of corporate networks. The academy has:

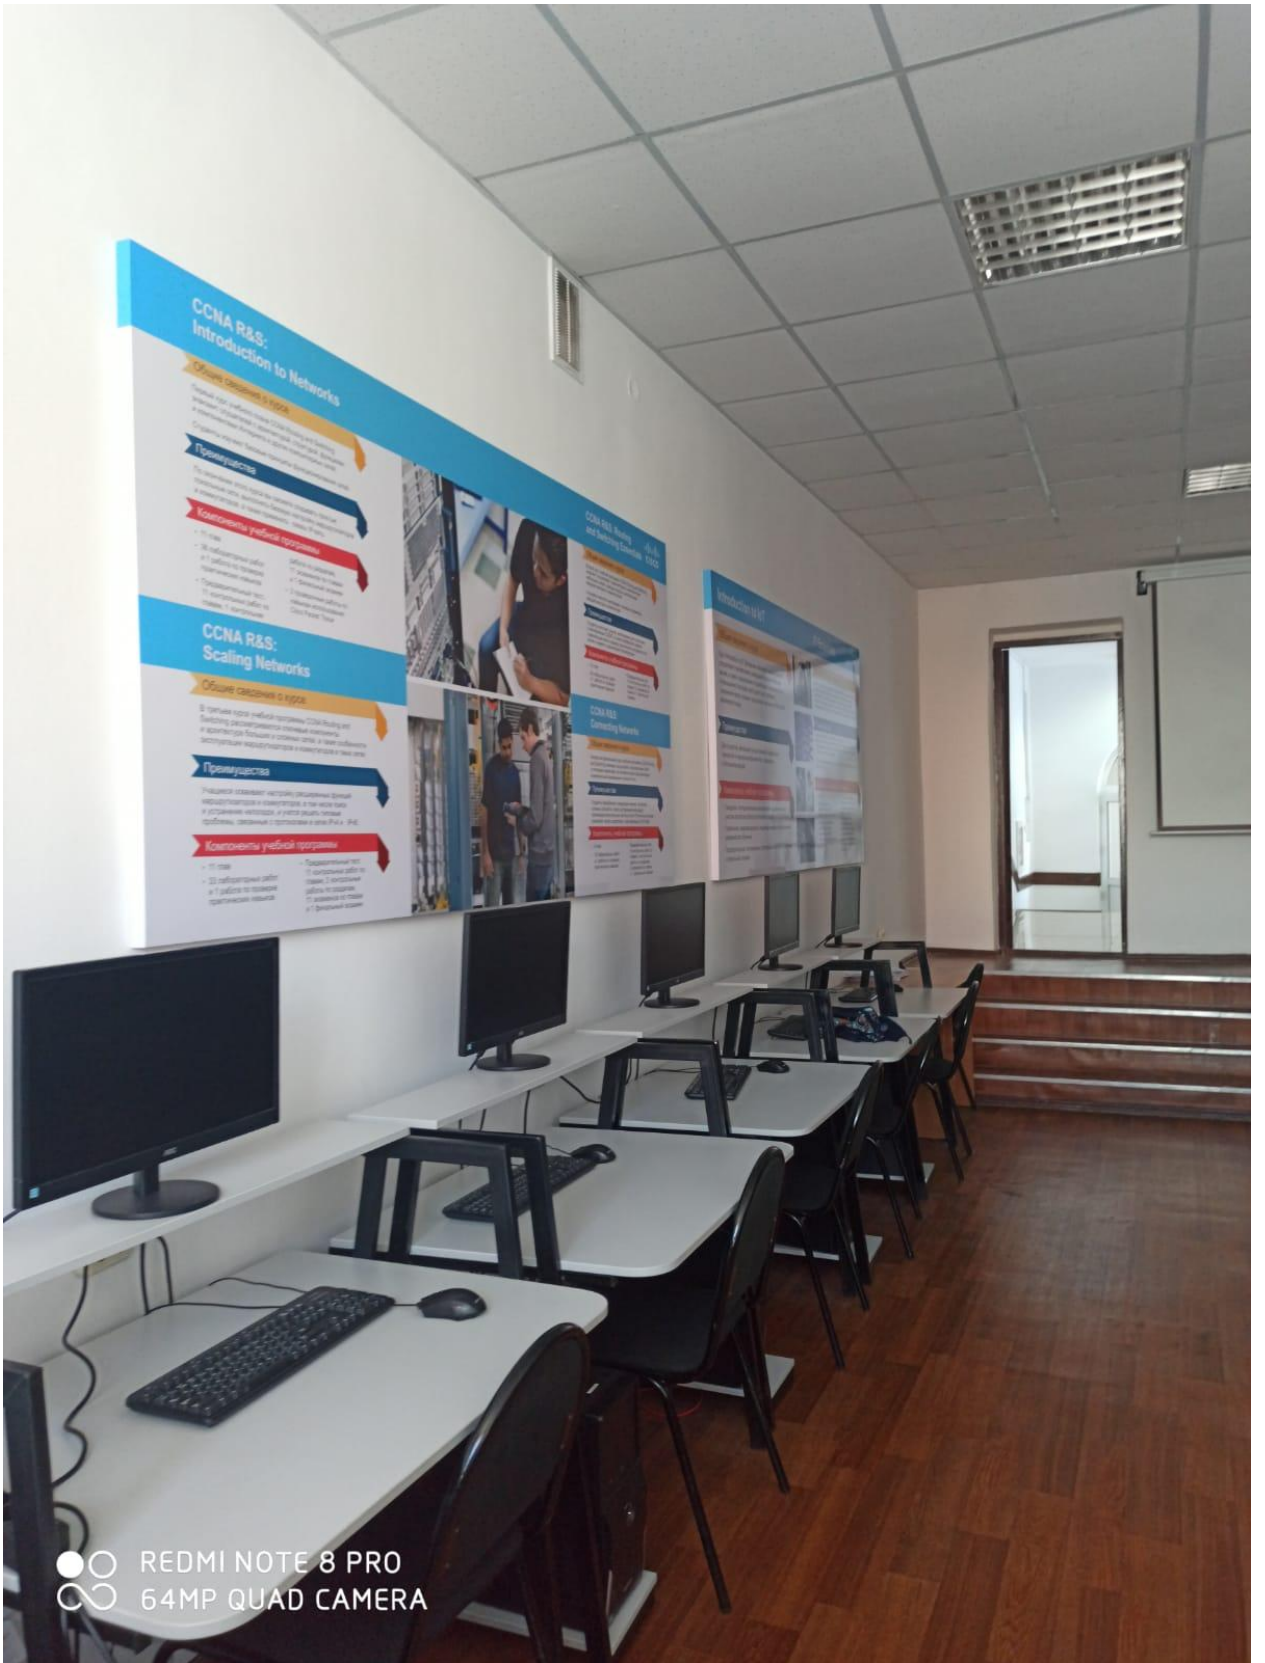

- 16 computers with good production characteristics;
- 3 routers;
- 4 switches;
- 2 access points;
- 2 IP phones;
- 1 uninterruptible power supply;
- 2 firewalls;
- 20 patch cords.

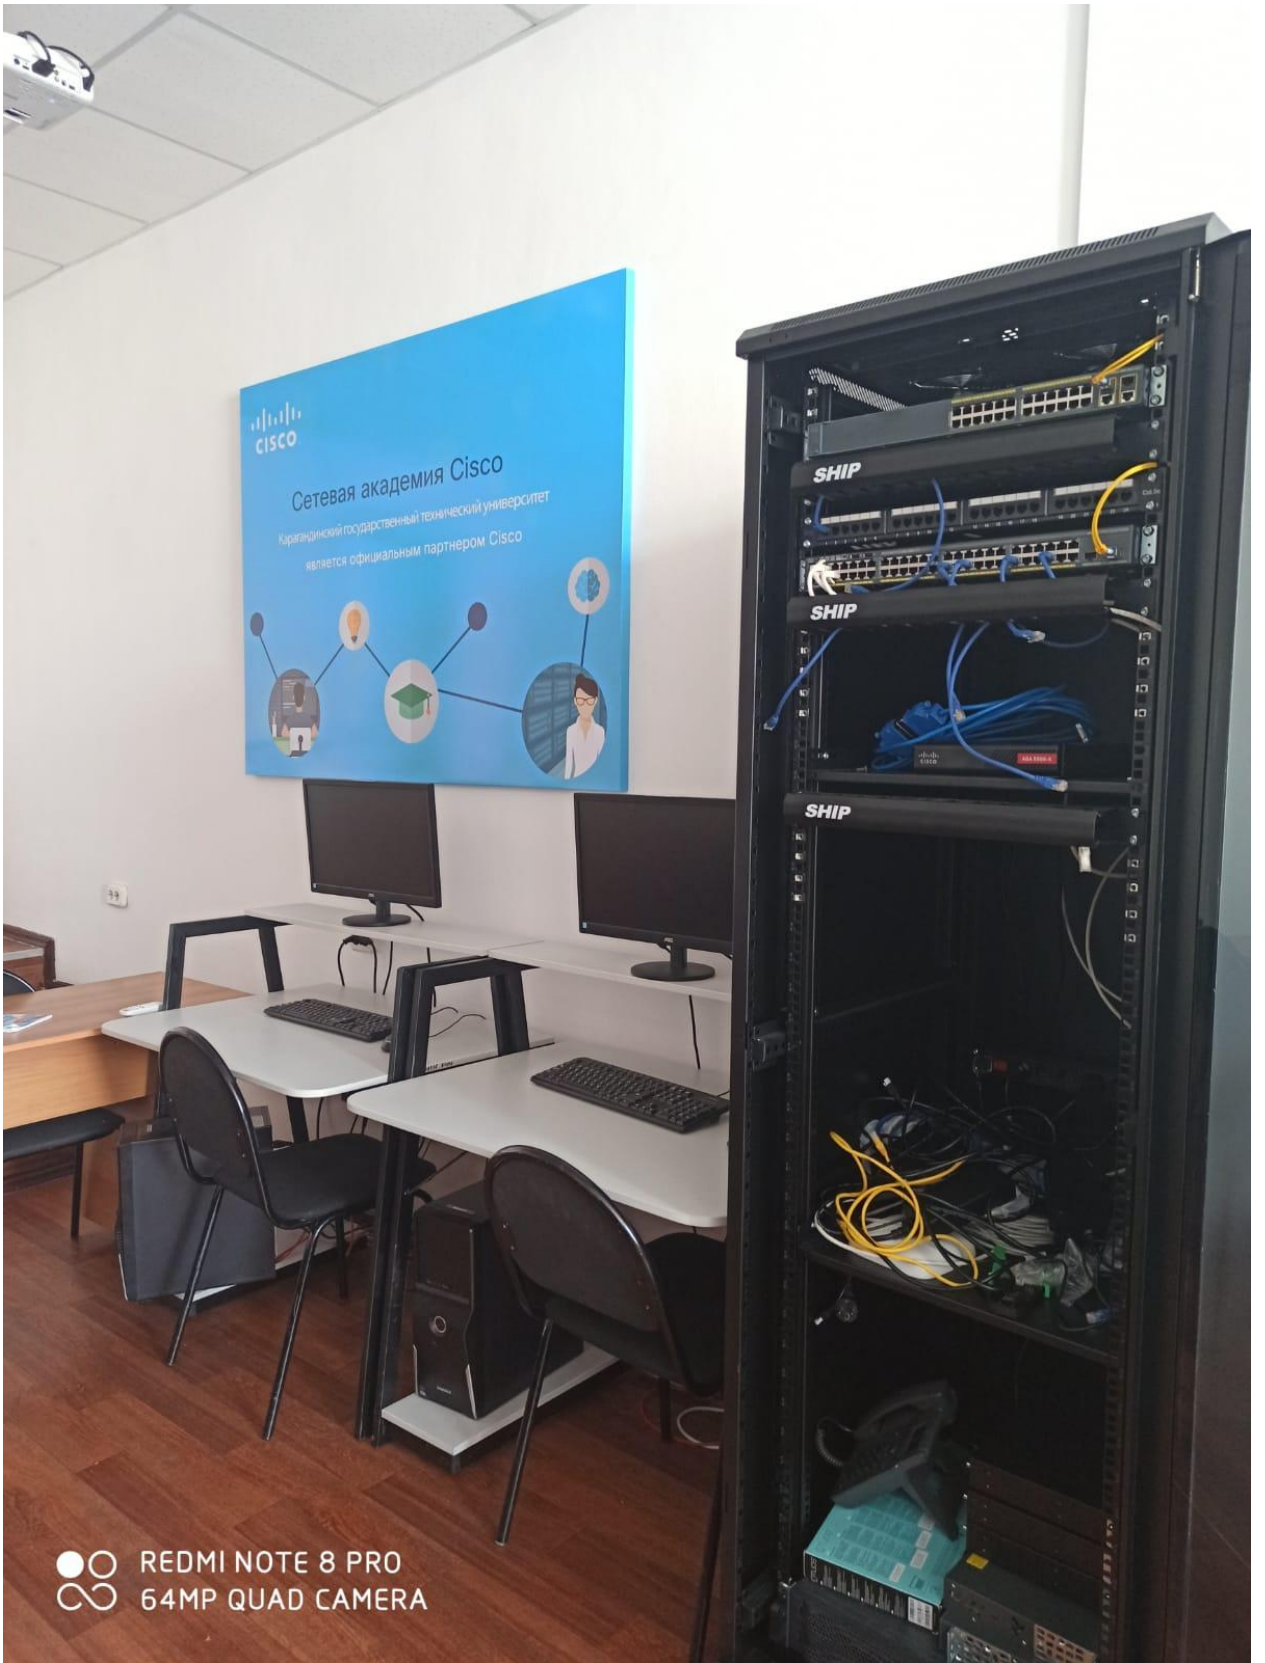

In this academy, students study courses in the following areas:

- introduction to the network;
- switching and routing in the local network;
- scalable network;
- building a converged network;
- studying IoT.

After the successful completion of the courses, students are issued certificates from the instructors of the academy. At the moment, the instructors of the Cisco Academy are the senior lecturers of the Department of Technologies and Communication Systems Yesenzholov Ulan Serikovich and Kaliaskarov Nurbol Baltabaevich.
