

Research directions:

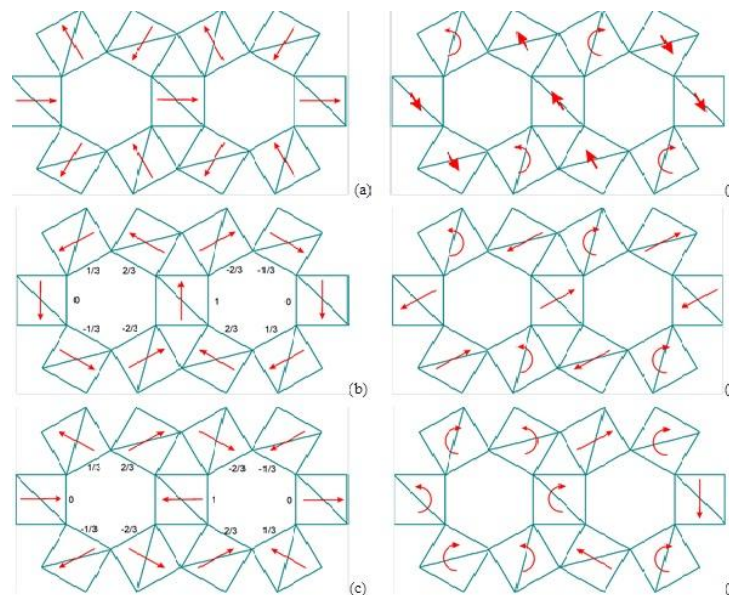

"Computer simulation as a method for deciphering the results of electro-optical studies of pre-breakdown processes in polar liquids" (supervisor associate professor Yasinsky V.B.)

"Spatial structure and conformational characteristics of alkaloid derivatives" (supervisor, Ph.D. Turdybekov D.M.)

"Wasteless technologies in the production of building products" (supervisor professor Smirnov Yu.M.)

"Energy transformations in crystals and complex organic molecules" (supervisor associate professor Mazhenov N.A.)
