

## Meeting of graduate students with representatives of companies

21 October 2022, a meeting was held with graduates of OP 6B07203 "Petroleum Engineering" of the Development of mineral deposits and Technological equipment, engineering and standardization departments with representatives of the QNP-KZ group of companies. The meeting was attended by representatives of "Defectosopia" LLP.

During the meeting, the specialists of Defectosopia LLP presented their achievements, told about the activities, advantages and prospects of the company's development in the oil and gas sector.

HR managers of the company interested in future graduates named after Abylkas Saginov told the 4th year students of the "Digital technologies in machine building", "Mechanical Engineering", "Technological machines and equipment" and "Standardization and certification" about the activities of the NGO "Flaw detection" with vacancies for the position of "flaw detector assistants". The students were informed about the prospects and conditions that the company offers. The students showed keen interest, asked lots of questions.

In addition to the company NGO "Defectoscopy", the group of the companies "Qazaq National Product" also includes LLP "Gormontazhproekt", LLP "Kazakhstan Institute for Industrial Assistance", LLP "QNP-Education". The company is engaged in the provision of engineering services in the field of industrial safety, such as Non-destructive testing, inspection of buildings and structures, environmental monitoring, etc.
